Education

University of Connecticut, Storrs, CT

May 2025

Bachelor of Science, Computer Science

Minor: Mathematics

Honors Program

GPA: 3.99/4.00

University of Connecticut, Storrs, CT

May 2026

Master of Science, Computer Science

Work Experience

Whelen Engineering Company, Chester CT

July 2022 – January 2025

Cybersecurity Intern - Contractor (Software Development)

- Evaluated and tested secure code training solutions, presenting findings to IT leadership along with a recommendation on which solution to implement
- Monitored EDR software for alerts and investigated security threats in sandbox environment
- Implemented backend API endpoints and developed a frontend React application to interact with SQL database through the API while working as part of an Agile software development team

AlgorithmicPro AI

July 2025 - Present

Software Developer/Researcher

- Implemented and optimized novel data linkage algorithms for entity resolution across large-scale datasets
- Designed an LLM-based interface layer using OpenAI Agent Builder to convert natural language queries into structured algorithmic inputs

Research Experience

University of Connecticut, Storrs, CT

January 2024-Present

Main Author- hyDNS: Acceleration of DNS Through Kernel Space Resolution

- Published a paper in SIGCOMM eBPF Workshop '24 on accelerating DNS with kernel-based resolution using eBPF technology

Skills

Languages: Python, C, C++, JavaScript, Scheme

Systems and Networking: Linux, TCP/IP, DNS, eBPF, Docker, AWS tools

Web and Backend: HTML/CSS, React, SQL, MongoDB, REST APIs, NodeJS, Flask

Cybersecurity: threat investigation, AppSec, EDR monitoring, malware analysis, DNS security
